DESCRIBE A LIGHT SOURCE

This document is an example that will help you complete the assignment in which you'll describe a light source.

Decorative LED ceiling lighting

Brand: Adesi

Model: Adesi armonía

Use: Interior

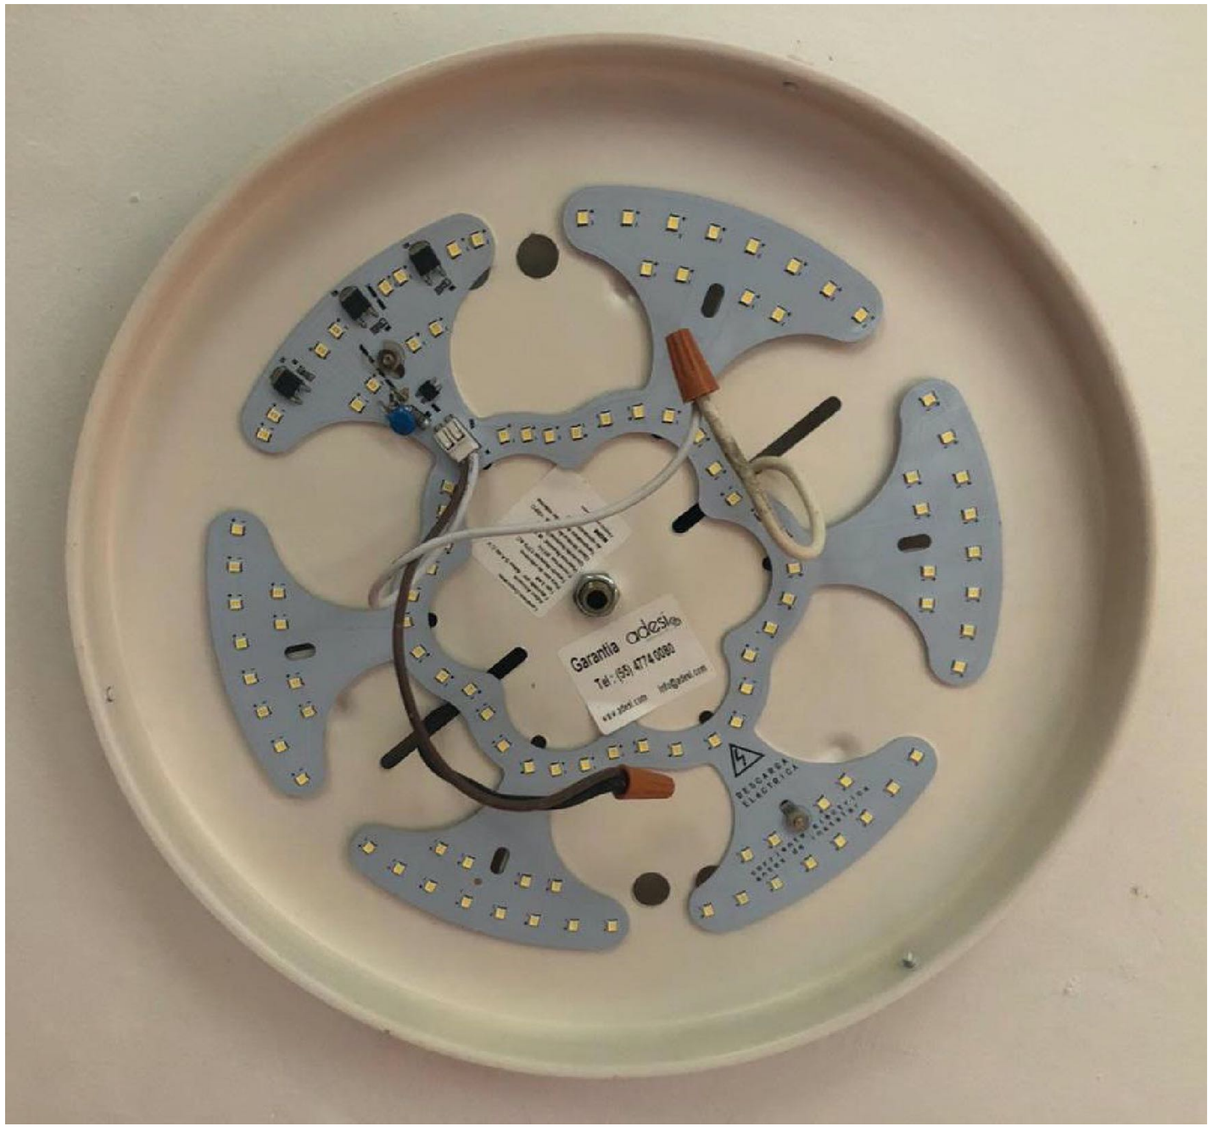
Strength: 18W

Voltage: 127V AC

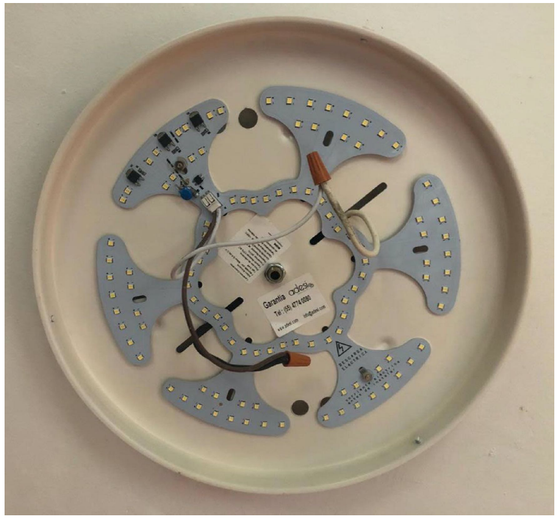
Temperature: Not included on the label, but it looks like cold light

Frequency: 60 HZ

Opening angle: 180°



Functionality

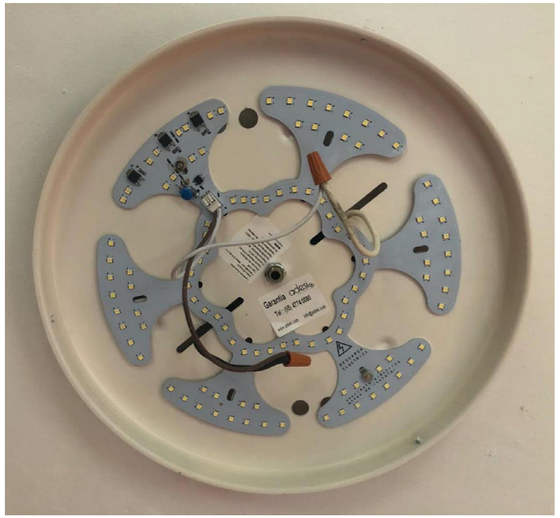


Does it do its job?

Decorative light fixtures are only good as ambient lighting. They work really well for working after 5 p.m. in front of the computer. However, when carrying out more detailed activities, it isn't useful.

Is it appropriate for the activities being done?

No, you'll need a light fixture that’s closer to the work table for activities that require more light.



Which other light fixture would you use?

I would add a light fixture to the desk that can be aimed in any direction you need. It could be a clip-on light so it occupies as little space as possible. The temperature definitely needs to be cold.
